EDUCATION

Georgia Institute of Technology

M.S. Computer Science

2026 – Present

Arizona State University

M.S. Computer Science (GPA: 3.9/4.0)

May 2025

B.S. Computer Science (GPA: 4.0/4.0)

May 2024

TECHNICAL SKILLS

Programming Languages: Python, C, C++, Java, R, C#, SQL, TypeScript, JavaScript

Backend & APIs: FastAPI, Flask, GraphQL, REST APIs, Pydantic, Docker, Redis

ML & AI: TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, OpenAI, Gemini, Anthropic APIs, LangChain, LangGraph

Cloud & Data: AWS (EC2, ECS, Fargate, ECR, Lambda, SQS, CloudWatch, IoT Core), Azure AI Foundry, GCP (OAuth, Cloud Storage), Linux, PostgreSQL, MySQL, Apache Kafka, Apache Spark, Splunk, Git, GitHub, JIRA

PROFESSIONAL EXPERIENCE

Relma AI

Remote

Founder & AI Engineer

February 2026 – Present

- Built an **LLM-powered** multi-agent code modernization platform that migrates enterprise code across **10+** languages using **LangGraph** and automated **CI/CD pipelines**, achieving a **90%** validation pass rate.
- Built self-correcting agentic workflows with **sandboxed execution**, automated retries, and RL-inspired feedback loops.

Handshake AI

Remote

Gen AI Software Engineer

December 2025 – Present

- Worked with frontier AI labs on **6+ AI projects** using prompt engineering, A/B testing, RLHF, and LLM evaluation.
- Evaluated and improved frontier LLMs and AI agents across coding, reasoning, and multimodal tasks.

MOOG Space and Defense

Gilbert, AZ

Software Engineering Intern

May 2024 – April 2025

- Built a full-stack inventory system with a **SQL Server** database, **Python FastAPI** backend, and **Streamlit** frontend to manage **10,000+** flight-critical hardware components, reducing retrieval time from **5 minutes** to under **3 seconds**.
- Implemented rigorous **C/C++** unit tests across **15,000+** lines of flight-critical software for NASA's Artemis III using **Unity/CMock**, achieving **100%** code coverage and deploying builds to **FPGA** development kits for test simulation.

Solisa AI (Startup)

Chandler, AZ

Machine Learning Engineering Intern

May 2024 – July 2024

- Built and trained a **Python TensorFlow** model on over **13K+** labeled samples, achieving an AUC score of **75%** while reducing false negatives using **DBSCAN** clustering and **NearMiss** undersampling.
- Automated GPU-based hyperparameter tuning in **Python** with **Optuna**, improving prediction accuracy by **7%**.

Astro Seed

Tempe, AZ

Machine Learning Engineering Intern

August 2023 – May 2024

- Led a cross-functional **5-person** team to build and fine-tune a **Python TensorFlow ResNet50 CNN** for plant nutrient deficiency detection, achieving **97%** accuracy and boosting precision by **12%**.
- Earned **2nd** place out of **130+** teams for delivering a high-performing ML solution.

Nike

Beaverton, OR

Software Engineering Intern

June 2022 – August 2022

- Automated **15+** **software health checks** in **Splunk Cloud** using **SQL** on **1M+** **logs**, cutting review time by **35%**.
- Integrated **Python**-based sentiment analysis into **Splunk** dashboards for real-time monitoring across **20+** data sources.

PERSONAL PROJECTS

AWS AI-Powered Face Recognition | Python, AWS, MTCNN, FaceNet

February 2025 – May 2025

- Architected a real-time edge AI pipeline using **AWS IoT Greengrass**, **EC2**, and **MQTT** for on-device face detection (**MTCNN**), achieving **0.77s** average latency across **100** test images.
- Built an inference backend (**AWS Lambda**, **SQS**, **FaceNet**, **Python autoscaler**) processing **100 requests in 96s**.

Job Intelligence Platform | FastAPI, PostgreSQL, Redis Queue, Docker, GPT-4o

January 2026 – Present

- Implemented a **Python** scraper with **proxy rotation** to ingest **15k+** **jobs** from **4 platforms** in under **5 minutes**.
- Implemented an **LLM-based extraction and search pipeline** with **GPT-4o**, persisting features in **PostgreSQL**, coordinating work via **Redis queues**, and running DB/queue services in **Docker** across **140+** **companies**.
